

WORKMAN HVAC ERP

Simple Client How-To Guide

Click-by-click steps for Jobs, Inventory, Procurement & Technician Mobile App

Very simple English. Each action shows **who** does it and **what to click**.

Demo: <https://hvac-erp-bay.vercel.app/>

Guide date: 28 Sep 2026 (PKT)

How to use this guide

Every task starts with a green **WHO** badge (the role). Then numbered clicks follow. Button names match the ERP and mobile app screens. Follow the numbers in order.

Main roles you will see

- **Dispatcher / CSR** — Creates jobs, assigns technicians, reassigns mid-job.
- **Technician** — Uses the mobile app: accept, start, pause, complete (with proof photos), request parts.
- **Storekeeper** — Issues stock to jobs, accepts returns, raises PRs when stock is low.
- **Purchasing / Buyer** — Creates RFQs and Purchase Orders from approved PRs.
- **Accountant** — Settles cash (hisaab), Sync & Lock (finalize) the job.
- **Call Center** — After complete: calls customer and technician, writes remarks (Feedback queue).
- **Auditor / Admin** — Verifies finalized jobs (after feedback + finalize) or sends them back with a note.
- **Approver / Manager** — Approves Purchase Requisitions and Purchase Orders.
- **Accounts Payable** — Does 3-way match and pays the supplier.

Contents

1. Jobs — create, assign, accept, start, pause/resume, complete (+photos), feedback, stock, finalize, verify, reassign
2. Inventory / Warehouse — issue, return unused, movements
3. Procurement — PR → RFQ → PO → GRN → 3-way match → pay
4. Technician mobile app — login, batch accept, job actions, parts/PR hub, reassigned jobs

1. Jobs

Jobs live under the left menu item **Jobs** → **Jobs Directory**. Button **+ New Job** opens the intake form.

The screenshot displays the 'Jobs Directory' page in the HVAC ERP system. The left sidebar contains navigation options like 'Dashboards Hub', 'Jobs', 'Point of Sale (POS)', 'Accounts & Ledgers', 'Procurement & Sourcing', 'Warehouse & Stock', 'HRM', 'Feedback Queue', 'Audit & Rollbacks', and 'Settings'. The main area shows a table of jobs with columns for Job # & External Ref, Customer, Job Type, Technician, Status, Amount, and Created. A '+ New Job' button is visible in the top right corner of the table area.

JOB # & EXTERNAL REF	CUSTOMER	JOB TYPE	TECHNICIAN	STATUS	AMOUNT	CREATED
JOB-2026-0021 EXT: PDF	Muhammad Muaz @ Gulshan Ravi	Duct Cleaning & Sanitization	TE Technician Empl...	Assigned	PKR 42,000	Sep 27 4:10 PM

Jobs Directory — list of work orders (+ New Job at top right)

WHO: DISPATCHER / CSR

1.1 Create a new job

1. Open **Jobs** from the left menu (Jobs Directory).
2. Click **+ New Job** (top right).
3. In **1. Customer & Location**: search customer by name or phone. If new, click **+ Add New Customer**, fill name/phone/address, save.
4. In **2. Job Classification**: pick **Job Nature / Type**, then Product / Brand / Model.
5. In **3. Line Items**: click **+ Add Product Line** and/or **+ Add Service Line**. Set qty and price.
6. In **4. Notes & Assignment**: type problem remarks. (You can assign tech now or leave blank for later.)
7. Click **Create Work Order** at the bottom.

Tip: Status becomes Created (or Assigned if you picked a technician).

The screenshot shows the 'New HVAC Job Intake' form. It includes sections for '1. CUSTOMER & LOCATION' with a search bar and '+ Add New Customer' button, '2. JOB CLASSIFICATION & EQUIPMENT DETAILS' with dropdowns for Job Nature / Type, Product / Appliance Type, Equipment Brand, and Model / Unit Specification, and a 'Care-Of / Subcontracted Order' checkbox.

New HVAC Job Intake form

WHO: DISPATCHER / CSR (OR ADMIN)

1.2 Assign one or many technicians (multi-crew)

1. Open the job (click **Details** on the Jobs list), or assign on the New Job form.
2. Find **Assign Technicians (Single or Multi-Crew) / Change Technician**.
3. Search and tick **one or more** technicians (crew).
4. Click **+ Assign Technician** or confirm in the drawer.
5. Job status becomes **Assigned**. Techs get a push / WhatsApp notice.

Tip: You can also assign from Live Dispatch Map by clicking a tech pin.

WHO: TECHNICIAN (MOBILE APP)

1.3 Accept a job

1. Open the Workman mobile app and go to the **Jobs** tab.
2. Find the job with status **Assigned**.
3. Tap the job card, then tap **Accept Job** → (or use batch accept — see Section 4).
4. Status becomes **Accepted**.

WHO: TECHNICIAN (MOBILE APP)

1.4 Start the job (on site)

1. Open the accepted job.
2. Tap **Start Job** when you arrive at the customer site.
3. Status becomes **InProgress**. GPS and time are saved.

WHO: TECHNICIAN (MOBILE APP)

1.5 Pause a job (day not finished) and resume later

1. On the job screen, tap **Pause for today / Pause Job**.
2. Enter units fitted today, units remaining, and a short reason / next resume time.
3. Confirm pause. Status becomes **Paused**. Stock normally **stays on site with the technician** (return to storekeeper is rare / optional).
4. Optional: visit the accountant for partial **hisaab** if useful — this is not required to resume.
5. Next day: open the paused job and tap **Resume work**. Resume is **not locked** on stock-return ack or hisaab.
6. Status goes back to **InProgress**.

Tip: Resume works after pause without requiring return acknowledgment or hisaab.

WHO: TECHNICIAN (MOBILE APP)

1.6 Complete the job

1. On the in-progress job, tap **Finish & take payment / Complete Job**.
2. Enter **actual quantity** for every line item (required).
3. Take or upload **proof-of-work photos** (camera or gallery). Photos are stored on the job and visible on the ERP job detail.
4. Add payment details / remarks if asked. If any parts were unused, say why.
5. Tap **Submit & close job**.
6. Status becomes **Awaiting Feedback** (call center queue next).

Tip: Photos appear under Completion photos on the web job page for staff and auditors.

Job detail after complete — photos & status on web

WHO: CALL CENTER / OFFICE STAFF — WEB ERP

1.7 Feedback (call customer + technician)

1. Open left menu **Call Center Feedback** (or Feedback).
2. Pick a job from the **Outbound Quality Check Queue** (status **Awaiting Feedback**).
3. Click **Start Call**. Call the **customer** and the **technician**.
4. Write **customer call remarks** and **technician call remarks** (both required).
5. Choose outcome (Approved / Disapproved / No Answer / Rescheduled) and log it.
6. On Approved or Disapproved, the job advances to **Completed (Pending Verification)** for the accountant.

Tip: Feedback runs right after complete — before accountant finalize and auditor verification.

WHO: STOREKEEPER (OR ADMIN) — WEB ERP

1.8 Issue warehouse stock to a job

1. Open the job from **Jobs** → **Jobs Directory** → **Details**.
2. Click **+ Issue Warehouse Stock** (top action bar).
3. Pick the material, enter quantity, confirm issue.
4. Or: if the tech requested parts, find **TECHNICIAN MATERIAL REQUESTS** and click **Fulfill & Issue**.

WHO: STOREKEEPER / TECHNICIAN — WEB OR APP

1.9 Record unused / returnable stock back to warehouse

1. On the job page, click **Record Stock Return**.
2. Select the unused item and quantity. Add reason if asked.
3. Save. Status shows **Awaiting Storekeeper Sign-off** until store confirms.
4. Storekeeper opens the return and acknowledges it (stock goes back to warehouse).

1.10 Finalize (Sync & Lock) the job

1. Open a job in **Pending Verification** (feedback already done).
2. Check planned vs actual lines, collections, and returns.
3. Record customer cash / hisaab if not done yet.
4. Click **Sync & Lock Record** (Make Work Order Immutable & Invoiced).
5. Job becomes **Finalized** (read-only) and moves to the Auditor queue.

Tip: After finalize, normal edits are blocked. Only auditor verify / send-back follows.

1.11 Auditor verify OR send back

1. Open left menu **Jobs** → **Auditor Verification**.
2. Open a **Finalized** job from the queue (feedback + accountant finalize already done).
3. Tick all 3 checklist items (work confirmed / payment reconciled / inventory returned). Review completion photos on the job.
4. To approve: click **Verify**. Status becomes **Verified** (done).
5. To reject: click **Send back**, type a required note, confirm.
6. Sent-back jobs return for correction (they are not silently edited).

Auditor Verification Queue

1.12 Reassign technician mid-job

1. On the Jobs list, click **Change** next to the technician name — or open the job and click **Change Technician**.
2. In the reassign drawer, search and select the new technician (or crew).
3. Confirm the change.
4. Old tech may see the job as reassigned / removed from their active list; new tech gets it as Assigned.

Assign Technician(s)

Change / reassign technician drawer

2. Inventory / Warehouse

Open **Warehouse & Stock** from the left menu. Use tabs **Stock Levels** and **Branches & Movements**.

Warehouse & Stock — catalog and levels

WHO: STOREKEEPER

2.1 Issue stock to a job (from warehouse or job page)

1. Option A — From job: open job → **+ Issue Warehouse Stock** → pick item & qty → confirm.
2. Option B — From job requests: open job → under Material Requests click **Fulfill & Issue**.
3. Check the **On Job** filter on Warehouse & Stock to see what is already with technicians.

Filter: On Job — stock currently with field techs

WHO: TECHNICIAN + STOREKEEPER

2.2 Record unused / returnable parts back

1. Open the job → click **Record Stock Return**.
2. Enter item, unused qty, and reason (e.g. Not needed).
3. Storekeeper opens the return line and signs off / acknowledges.
4. Warehouse quantity increases again after sign-off.

2.3 Inter-branch movements (transfers)

1. Open **Warehouse & Stock**.
2. Click tab **Branches & Movements**.
3. Under **Dispatch Stock to Another Branch**: pick Source Branch, Destination Branch, Item, Qty.
4. Confirm the transfer.
5. Use **Discrepancy Adjustments** only when a physical count differs from system stock.

The screenshot displays the 'Warehouse & Stock Management' interface in the HVAC ERP system. The left sidebar shows the navigation menu with 'Warehouse & Stock' selected. The main content area is titled 'Warehouse & Stock Management' and includes a search bar and tabs for 'Stock Levels' (7 Low) and 'Branches & Movements'. Below the tabs, there are four cards representing different branches: 'Central Warehouse (Lahore Hub)' with 217 units on hand and 3 inter-branch dispatches, 'Karachi Regional Depot' with 91 units on hand and 1 inter-branch dispatch, 'Islamabad Regional Depot' with 61 units on hand and 2 inter-branch dispatches, and 'Faisalabad Workshop & Spares' with 33 units on hand and all transfers clear. The 'Inter-Branch Transfer' tab is active, showing a form to 'Dispatch Stock to Another Branch'. The form includes dropdowns for 'Source Branch (From)' (Central Warehouse (Lahore Hub)) and 'Destination Branch (To)' (Karachi Regional Depot), a 'Select Item to Transfer' dropdown, and input fields for 'Quantity' (5) and 'Challan #' (TMR-2026-X). A 'Transfer Notes & Vehicle Ref' field is also present. To the right, the 'RECENT BRANCH MOVEMENT CHALLANS' section shows a message: 'No active inter-branch transfers recorded yet. Dispatch a new transfer on the left.'

Branches & Movements — inter-branch transfer form

3. Procurement (PR → RFQ → PO → GRN → Match → Pay)

Open **Procurement & Sourcing** from the left menu. Use the top tabs: Approvals · Requisitions · RFQ · Purchase Orders · Goods Receipt · 3-Way Match · Payments.

Procurement overview / Requisitions tab

WHO: STOREKEEPER / SITE ENGINEER / BUYER

3.1 Create and submit a Purchase Requisition (PR)

1. Open **Procurement & Sourcing** → tab **Requisitions**.
2. Click **Create Purchase Requisition**.
3. Choose target (Store / Site / Job), priority, required-by date.
4. Add line items (material + qty). Save / Submit.
5. Status becomes **Submitted** (waiting for approval).

WHO: MANAGER / APPROVER

3.2 Approve a PR

1. Open **Procurement & Sourcing** → **Approvals** (or Requisitions list).
2. Find the Submitted PR.
3. Click **Approve** (or Reject with a note).
4. Approved PRs show action **Create PO**.

WHO: PURCHASING / BUYER

3.3 Create RFQ from one or many PRs / lines

1. Open tab **RFQ**.
2. Click **Create RFQ Sourcing Package**.
3. Select one or more approved PR lines to include.
4. Invite vendors, set bidding due date, save.
5. When quotes arrive, click **Enter Quote** per vendor, compare the matrix, then **Award** the winner.

Tip: RFQ can cover multiple PR lines so you buy several needs in one package.

RFQ competitive quotation matrix

WHO: PURCHASING / BUYER + APPROVER

3.4 Create Purchase Order from PR(s)

1. From an Approved PR row, click **Create PO** — or open tab **Purchase Orders** → **Create Purchase Order**.
2. Confirm vendor, lines, delivery date, and terms.
3. Save. Draft PO appears with actions **Approve PO / Reject**.
4. Approver clicks **Approve PO**, then **Send to Vendor** when ready.

Purchase Orders list

WHO: STOREKEEPER / RECEIVING

3.5 Record Goods Receipt (GRN) against a PO

1. Open tab **Goods Receipt**.
2. Start a new GRN / **Receive Goods** linked to the Purchase Order.
3. Enter qty received, warehouse location, delivery challan if any.
4. Post the GRN. Stock increases; GL posts Dr Inventory / Cr AP.

GRN NUMBER & DATE	PURCHASE ORDER REF	SUPPLIER NAME	WAREHOUSE LOCATION	DELIVERY CHALLAN	RECEIVED ITEMS	ACCOUNTING SL	ACTION
GRN-2026-0010 8/12/2026	PO-2026-0003	Indus Refrigerants & Chemical Gases	Central Warehouse...	DC-190-9799	1 Item(s) • 10 units	IN 1299 / CR 3000	[Icons]

Goods Receipt (GRN) list

WHO: ACCOUNTS PAYABLE / ACCOUNTANT

3.6 Three-way match (PO + GRN + Supplier Invoice)

1. Open tab **3-Way Match**.
2. Click **Enter Supplier Invoice (3-Way Match)**.
3. Link the vendor invoice to the PO and GRN.
4. Check amounts. Zero variance → status **Approved For Payment**.
5. If mismatch, resolve discrepancy before paying.

INVOICE # & REF	VENDOR / SUPPLIER	LINKED PO & GRN	INVOICE DATE	BILLER AMOUNT	VARIANCE	MATCH STATUS	ACTION

3-Way Match — supplier invoices

WHO: ACCOUNTS PAYABLE / FINANCE

3.7 Pay the supplier

1. From 3-Way Match row, click **Pay Bill** — or open tab **Payments**.
2. On a Pending Payment invoice, click **Disburse Payment**.
3. Choose bank / cash, amount, confirm.
4. Status becomes **Fully Settled** when balance is zero.

4. Technician Mobile App

Use the Workman mobile app (Expo / Field Companion). You can also preview flows in the web demo under **Field Companion**.

Mobile Field Companion — Jobs home (web simulator)

WHO: TECHNICIAN

4.1 Login

1. Open the Workman mobile app.
2. Enter your phone / username and password.
3. Tap **Login**.
4. You land on the **Jobs** tab (Field Work Orders).

WHO: TECHNICIAN

4.2 Batch accept several jobs

1. On the Jobs list, tap **Select jobs**.
 2. Tick each Assigned job you want to take.
 3. Tap **Accept N** (button shows the count).
 4. Wait until it says done. All selected jobs become **Accepted**.
 5. Tap **Cancel select** to leave select mode.
- Tip:** Useful at the start of the day when many jobs were assigned overnight.

WHO: TECHNICIAN

4.3 Job actions (one job)

1. Tap a job card to open it.
2. **Accept** → then **Start Job** on site.
3. Need a break / next day: **Pause Job** (stock usually stays with you; hisaab optional).
4. Next day: **Resume** anytime — not locked on return/hisaab.
5. Finished: **Complete Job** → photos + actual qty's → **Submit** → status **Awaiting Feedback**.
6. Optional: log expense, request discount (call accountant), request warehouse parts.

4.4 Parts & PR hub

1. From Profile (or Jobs), open **Parts & materials**.
2. Tap **Request warehouse parts** for an active job (Accepted / InProgress).
3. Pick item, qty, note → submit. Storekeeper sees the request on the job.
4. If stock is not available, use **Request PR** (purchase requisition) from the parts area so purchasing can buy it.

4.5 Reassigned jobs

1. If a dispatcher clicks **Change** / reassigns your job to someone else, that job leaves your active list (status TechnicianReassigned / removed from filters).
2. Open **Sync** on the Jobs screen if the list looks stale.
3. The new technician sees the job under **Assigned** and must Accept it again.
4. Do not keep working a job after it was reassigned away from you.

Quick status path (job lifecycle)

Created → Assigned → Accepted → InProgress → (optional Paused → InProgress) → Awaiting Feedback → Completed (Pending Verification) → Finalized → Verified

Quick buy path (procurement)

PR (create/submit) → Approve → RFQ (optional) → PO (create/approve/send) → GRN (receive) → 3-Way Match → Pay
